- ✓ Non-Medical Home Care
- ✓ Quality Oversight
- ✓ Family-Centered Care

Howard W

Written by Gloria W

My husband received services from WFC for about 1.5 years as he was dealing with the side effects of Parkinson's. His medical/physical/mental condition regressed to the point where he needed 24/7 aide-care involving total care including washing, toileting, turning, feeding etc.

The care that Howard received from WFC, and in particular from Tara, who spent more time with him than any other aide, was exemplary. It is difficult for me to convey how important that was for Howard and me.

As a result, Howard was able to be cared for at home until his death. Tara was also extremely supportive to me making my role as a caregiver easier and better for Howard. The nurses came regularly and were on call for telephone help, again helping my caregiver role. Glenn, also, was always available if I needed information or advice. I do not think I could have kept Howard at home without the help I received from WFC.
