- ✓ Is he/she verbally or physically abusive?
- ✓ Is he/she becoming more forgetful?
- ✓ Have there been recent falls?
- ✓ Is your loved one having trouble sleeping?

Our Story

Who are we? We are you.

"In September 2010, my mother, my mother-in-law, and her sister were all diagnosed with Alzheimer's Disease. We were devastated and overwhelmed. But we knew we had work to do, and our journey began. We learned about Alzheimer's and dementia and any available treatments. We learned how to care for our loved ones properly. We also learned that we needed to care for ourselves.

Since then, we have shared our story with friends and acquaintances. And like us, they wanted their loved one to be cared for, safe, and at home, but they needed help. So this became our mission, and Westchester Family Care was born.

So why do we care? We care because we understand the pain, the sadness, and the confusion. We understand that every client and personal situation is different and requires its own solution. We also know that your health and peace of mind are important too."

- Glenn Lane, Founder
