- ✓ Non-Medical Home Care
- ✓ Quality Oversight
- ✓ Family-Centered Care

Howard W

Written by Gloria W

My husband received services from WFC for about 1.5 years as he dealt with the side effects of Parkinson's. His condition regressed, and he needed 24/7 total care, including washing, toileting, turning, feeding, etc.

The care that Howard received from WFC, and in particular from Tara, who spent more time with him than any other aide, was exemplary.

In one case, he was able to solve a problem, which would have complicated his care. Howard was able to be cared for at home until his death. Tara was also extremely supportive of me, making my role as a caregiver easier and better for Howard.

The nurses came regularly and were on call for telephone help. Glenn was always available if I needed information or advice. I don't think I could have kept Howard at home without WFC.
